

Serie PROTOR 2

Mechanic gear motor for rolling shutters

Two times more powerful. PROTOR-2 even keeping untouched the main characteristics from Protor gives the double of power. Of a superior reliability is the ideal solution for the automation of heavy rolling shutters. A careful policy over the quality of his products and over the activity of all his staff, places PROGET as leader on a national and international basis.

The sturdiness of PROTOR gives to his entire range of products the guarantee of a long duration in time even if any maintenance is required.

The total PROTOR reversibility facilitate a comfortable and easy maneuver also in absence of electricity.

Serie PROTOR 2

Versions

PROTOR 42A	Motor gear for Rolling shutters. Lifting weight 300Kg
